Item Title:

Police Department Unmanned Arial Drone

Contact Person:

Chief Matt Koch

SUMMARY EXPLANATION & HISTORY:

Attached is a quote for an unmanned aerial drone system for Carlisle Police Department. Over the past several years, the Carlisle Police Department has researched and been working on a drone program. A public safety quality drone is something that will be utilized in search and rescue, offender apprehension, surveillance, search warrants, evidence captures and public relations. Over the last year specifically, officers of the Carlisle Police Department have been taking the FAA- Part 107 courses to become certified drone pilots. Through my research of the drone and program, I did reach out to our city's insurance provider, and it would add a minimal cost of approximately \$508.00 annually to our policy that covers liability and physical damage.

FUNDING:

The Carlisle Police Department would use funds from drug asset forfeiture pay for the drone and related equipment as a onetime expense. The current balance of the drug forfeiture account is around \$24,699.38 and the cost of \$508.00 would come out of the police department budget.

PROFESSIONAL REVIEW/OPINION (IF REQUIRED):

N/A

ALTERNATIVES:

- 1. Approve the item.
- 2. Deny the request.
- 3. Staff should conduct further research.
- 4. No action at this time.

RECOMMENDATION:

It is my recommendation that the council approve this purchase. This provides the department a valuable tool, while not impacting the city's general fund or capital expenses.

A reconnection fee in an amount established by the governing body shall be applicable when service has been disconnected pursuant to this section.

SECTION 3.5 CUSTOMER OBLIGATIONS

DIVISION FOUR SERVICE EXTENSIONS

SECTION 4.1 GENERAL

All service extensions up to the point of attachment with the customer's wiring system will be installed, owned, operated, and maintained by the Utility. Under certain conditions the customer requesting an extension will be required to pay either a non-refundable contribution in aid of construction or a refundable deposit before the extension will be constructed. The City Council reserves the right to waive any required contributions or deposits, in whole or in part, upon a determination that the waiver is in the public interest. Such waiver, when extended in the minutes of the Council shall not be considered a discriminatory practice.

SECTION 4.2 TEMPORARY SERVICE

The Utility will furnish temporary service for construction or other uses provided it has sufficient capacity available at the proposed location and the customer agrees to pay the total cost of the installation and removal of the service. This payment will be treated as a contribution in aid of construction, and is not refundable. The customer is responsible for the installation and ultimate removal of the temporary meter loop at the location acceptable to the Utility.

SECTION 4.3 SINGLE PHASE EXTENSIONS (Primary)

All single phase extensions will be installed underground. When a customer requests a service that requires an extension, that customer will be charged the full cost of all material required for the extension, including primary and secondary cable and transformer, plus a per foot charge for trenching to be determined by the governing body. This cost will be treated as a contribution in aid of construction, and is not refundable.

SECTION 4.4 THREE PHASE EXTENSIONS (Primary)

All three phase extensions will be installed underground. When a customer requests a service that requires an extension, that customer will be charged the full cost of all materials required for the extension, including primary cable and transformers, plus a per foot charge for trenching to be determined by the governing body. This cost will be treated as a refundable deposit. Each year for ten consecutive years, the first time being one year from the date the installation is ready to be energized by the Utility, any refund due the customer will be calculated and paid by the Utility to the customer then receiving energy from the installation. Each annual refund will be calculated as 15% of the total of the monthly billings for this customer for the preceding 12 months, as long as the cumulative amount refunded does not exceed the original deposit.

SECTION 4.5 SERVICES

Effective Date: August 24, 2018 18 | P a g e

SERVICE RULES OF THE CARLISLE MUNICIPAL ELECTRIC UTILITY

4.5{1} Residential Services

All residential services up to the point of attachment (the connection at the weather head for overhead services or the meter socket line terminals for underground services) will be installed, owned, operated, and maintained by the Utility. Each customer will be charged a contribution in aid of construction at the time a new underground service (including conversion of overhead to underground service unless originated by the Utility, and the installation of a replacement service of increased capacity) is installed. The charge will be determined by the governing body.

4.5{2} Commercial and Industrial Services

Commercial and industrial overhead services up to the point of attachment (the connection point at the weather head) will be installed, owned, operated, and maintained by the Utility. Commercial and industrial underground services will be installed, owned, operated, and maintained by the customer, with the point of attachment being the secondary terminals of the pad mounted transformer feeding the service.

SECTION 4.6 METERING

4.6{1} General

All billing meters will be installed, owned, operated, and maintained by the Utility. Instrument transformers required by the Utility will be furnished by the Utility for installation by the customer, and will be operated and maintained by the Utility. Meter sockets, instrument transformer enclosures, test switches, meter wiring, and other meter accessories will be installed, owned, operated, and maintained by the customer in accordance with the specifications and requirements of the Utility.

Except as required in paragraph 4.6{4}, the metering is to be located ahead of the service disconnect switch.

4.6{2} Single Phase, 400 Amps or Less

All single phase 120 volt or 120/240 volt services rated 400 Amperes or less must be equipped with self contained meter sockets of a type approved by the Utility. The minimum meter socket size allowable is 200 Amperes.

4.6{3} Single Phase, Over 400 Amps

All single phase 120/240 volt services rated more than 400 Amperes must be equipped with two current transformers installed in accordance with Utility specifications, and connected to an approved meter socket with test switch.

4.6{4} Three Phase, 200 Amps or Less

All three phase services rated 200 Amperes or less must be equipped with self contained meter sockets of a type approved by the Utility. The minimum meter socket size allowable is 200 Amperes. For services rated 277/480 volts, there must be a service disconnect switch located ahead of and immediately adjacent to the meter socket.
